Health and Nutrition at The Learning Patch

Meal times are a great way to teach children about good nutrition, table manners and socialization. The Learning Patch will provide two nutritious meals and an afternoon snack every day. The children will also get to help prepare certain meals and snacks. Our staff eats all meals with the children, as it is such a great way to discuss nutrition and encourage good eating habits.

The Learning Patch encourages physical growth through a number of activities. We enjoy outdoor play daily. In the case of extreme weather, we do supplemental activities inside. Our mornings also include exercise routines that the children love to share with their families.

Our Preschool Program

Our preschool program is designed to have children ready for the academic world that awaits them. Working closely with local kindergarten teachers The Learning Patch uses a curriculum with proven results. We also provide academic portfolios for the children so parents may see exactly how their children are progressing in our program.

Television at The Patch

At the Learning Patch we feel there is no need to have a television in the classroom, television is for at home, there are a million other activities that we fill our days with.

Computers

Computer time at The Learning Patch is closely monitored and it is up to the parent or guardian as to whether or not their child may use it.

Safety First

At The Learning Patch, the safety of the children is our main priority.

For this reason, we do not give tours during preschool hours. We also do not let delivery or maintenance people in the building while the children are present.

We require photo IDs for anyone other than a parent/guardian picking up a child.

We encourage families to come visit throughout the day to play and learn with us. We just ask that written approval be given if someone other than a parent or guardian is coming to visit.
